ABSTRACT

The guide is one of a series of 10 units composing an orientation to the world of work course designed especially for disadvantaged and handicapped students in the 9th and 10th grades. It is designed to provide basic and remedial instruction in personal development, math, and language skills while providing information and skills basic or common to employment in all occupations. Topics treated in the course are: (1) income tax laws, (2) tax tables, (3) filing a Federal individual income tax return, and (4) filing a State individual income tax return. On completion of the course, the student will be able to list purposes and requirements of filing tax returns, interpret income tax table information, and accurately complete Federal and State individual income tax returns. Lesson plans present major and supporting concepts and specify performance objectives. Suggested resources are correlated to teaching-learning-evaluation strategies, which are subdivided to meet the separate needs of the disadvantaged and the handicapped. A resource section specifies sources and costs of audiovisual aids. The final section offers student materials which include a variety of supportive classroom materials. (MW)

UNIT: TAXES AFFECTING THE WORKER

I. Rationale

Many students in this class will be working and some earning money for the first time. An understanding of the need for taxes and why the gross income is more than the net income will enable these students to plan a realistic budget. It is essential that they know when, where, and how to file personal income tax since they will, at some point, be required by law to do so. They also need to know that even though they pay income taxes, they may be eligible--as part-time workers--for a complete or partial return of the taxes they paid out of their salaries.

II. Subject Matter Outline

A. Income Tax Laws

1. Purposes of Income Tax
2. Requirements for Filing

B. Tax Tables

III. Unit Objectives

The student will

A. List purposes for and requirements necessary for filing income tax return.

B. Interpret the information contained in the income tax table.

C. Complete with accuracy a federal individual income tax return.

D. Complete with accuracy a state individual income tax return.

IV. Suggested Interest Approach

A. Display the various sources of federal and state taxes. Use colored yarn to illustrate some benefits tax payers receive from each tax. (Book No. 7, Life Today, "Taxes and Taxes," chapter 20)

B. Prepare a bulletin board with caption "Our Government Dollar," (a blown up version of Student Material, p. 22). Add current figures for each category showing "where it comes from and where it goes." Involve class in a discussion.

C. View a film which encourages evaluation of federal taxation and discusses questions as: Are our federal taxes fair? Are they adequate for our needs and consistent with our economic goals?

1973 Tax Tables

For persons with incomes under $10,000 who do not itemize deductions on Schedule A, Form 1040.

If you could be claimed as a dependent on your parent's return and line 15 on your Form 1040 includes income other than earned income, do **not** use the Tax Tables. See Chapter 1.

Earned income means wages, salaries, professional fees, etc. for personal services rendered. It does not include compensation for your services that was a distribution of earnings and profits rather than a reasonable allowance for your work for a corporation.

If you engaged in a business in which both personal services and capital produced income, consider as earned income a reasonable allowance for your services, not more than 30 percent of your share of net profits of the business.

The standard deduction and deduction for exemptions have been taken into account in figuring the tax shown in these Tables.

The Tables show the lower tax after taking into account both the percentage standard deduction and the low income allowance except in the case of married people filing separately. For married people filing separate returns, the tables show the tax figured on the percentage standard deduction and on the low income allowance.

Select the Tax Table that covers the total number of exemptions on line 7. On the appropriate table, read down the income columns until you find the line covering the adjusted gross income you entered on line 15. Then read across to the column heading describing your filing status. Enter the tax you find there on line 16.

Married people filing separate returns: Choose either the low income allowance or percentage standard deduction to figure your tax. But if one uses the percentage standard deduction, both must use it. **If you are married and living apart from your spouse,** see Chapter 2 to see if you can be considered "unmarried" for purposes of using the tax tables below.

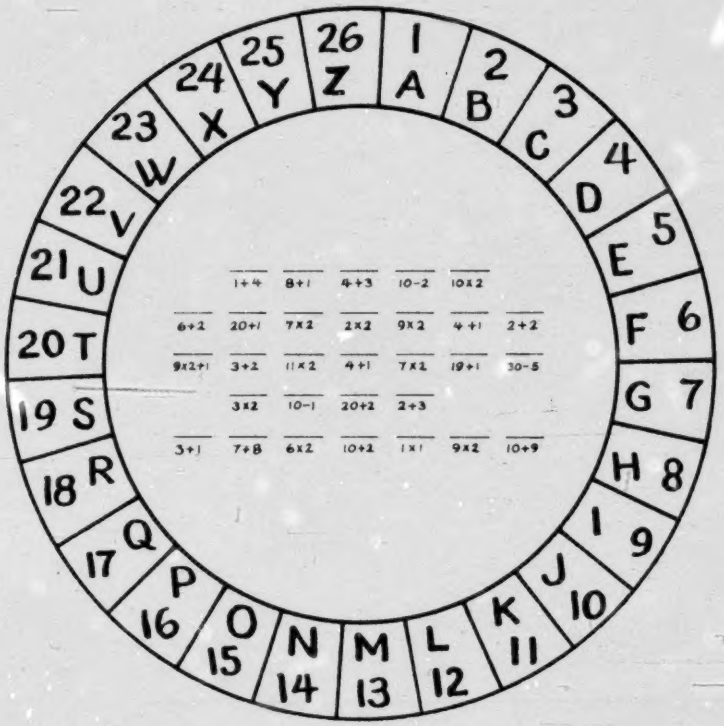
CODING WHEEL NO. 1



Assuming you worked for Company X for one year, determine the total wages received by working the math beneath each line and matching the answer to the alphabet in the circle.

(Ex.) $\frac{e}{1 + 4 = 5}$ and 5 corresponds to the letter (e)

$\frac{i}{8 + 1 = 9}$ and 9 corresponds to the letter (i)

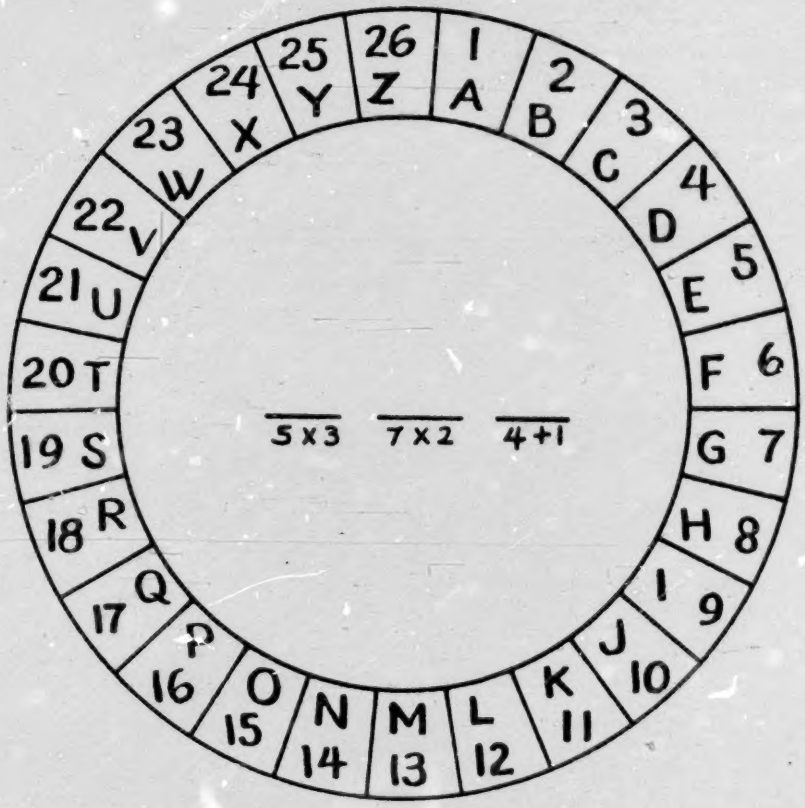
$\frac{g}{4 + 3 = 7}$ and 7 corresponds to the letter (g)

$\frac{h}{10 - 2 = 8}$ and 8 corresponds to the letter (h)

$\frac{t}{10 \times 2 = 20}$ and 20 corresponds to the letter (t)

(Eight) spells the first numerical number of the total wages received. Complete the exercise to get the figure to use when completing the 1040 long or short form.

CODING WHEEL NO. 2



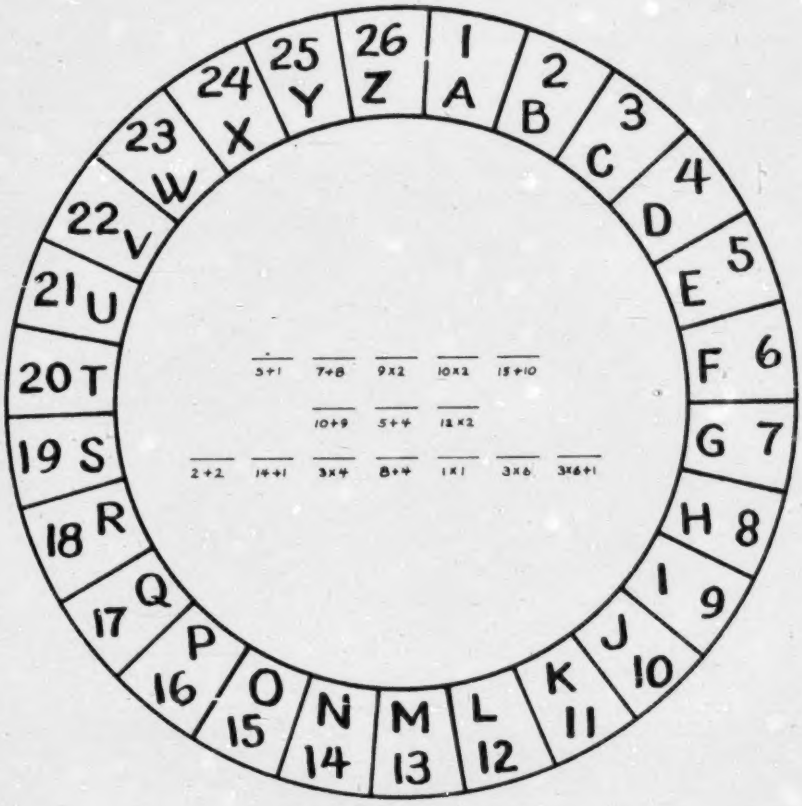
Determine the number of exemptions you are claiming by working the math beneath each line in the wheel and matching the answer to the alphabet in the circle. Example "o"

5 x 3 = 15.

The number "15" corresponds to the letter "o" which is the first letter of the number of exemptions to be claimed on the 1040 long or short form. Proceed to the next until all is finished. This will spell the number to be used.

G OWENS, CURR. DEV. CNTR., U.K. - 1051-13

CODING WHEEL NO.3



Determine the total federal income tax withheld by working the math beneath each line and matching the answer to the alphabet in the circle. Example $\overline{5+1=6.}$ Six corresponds to the alphabet "F."

Place "F" on the line above $\frac{F}{5+1}$ then proceed to the next until all spaces are filled. This will spell the number to be used as total income tax withheld on the 1040 long or short form.
